

■ Default + Belady
 ■ Default + ILP-Greedy
 ■ COSMA (native ILP)
 ▨ Baseline FAILS outright (allocator fragmentation)

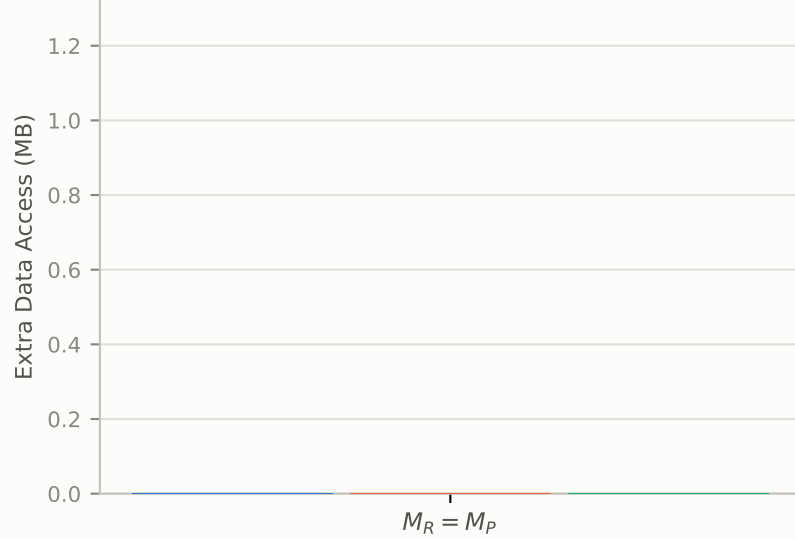

ResNet-50 (FP32)

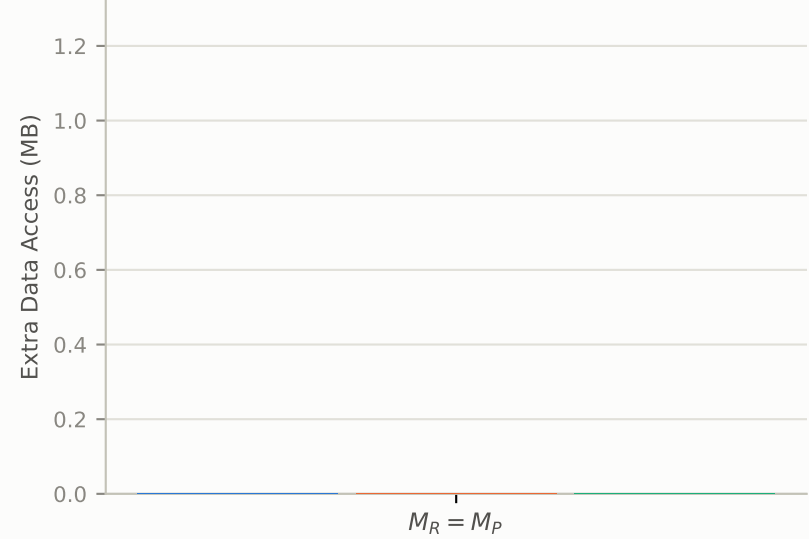

ResNet-50 (INT8)

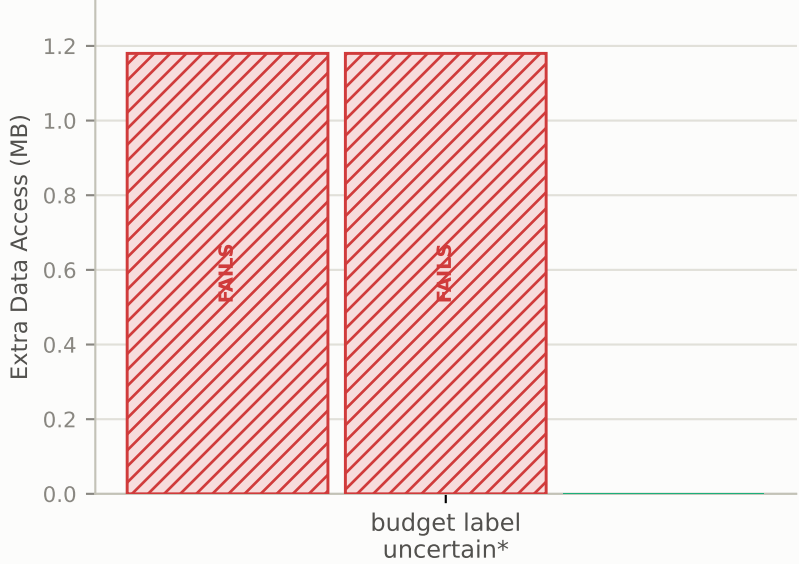

DeepLabV3 (FP32)

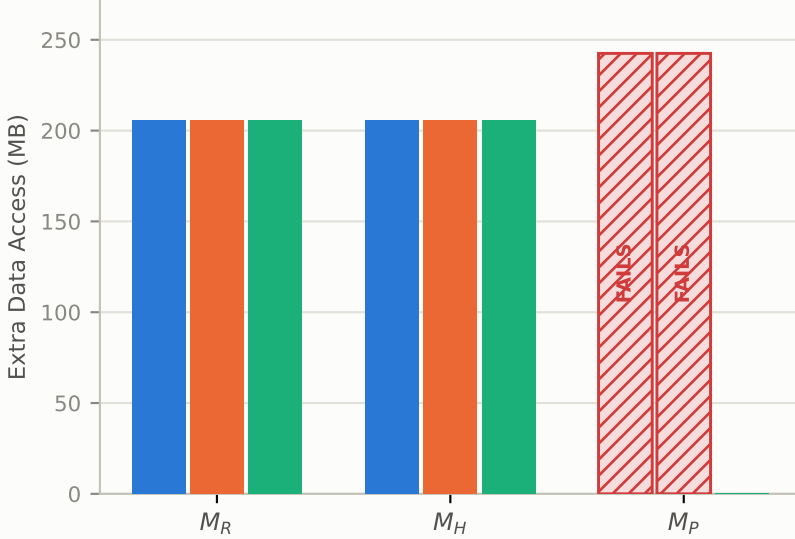

FCN (FP32)

ResNeXt-50 (FP32)*

R2Plus1D-18 (FP32)

* ResNeXt-50's budget label is unverified (see paper_comparison_results.md §4 caveats).
 Hatched red bars are not 0 MB -- the baseline's allocator could not place tensors at all; height is a visual sentinel, not a value.
 DenseNet excluded: COSMA's own ILP hit the solver time limit (Not Solved) on that model and produced no provable result.
